

SEE A DOCTOR by Live Video

Starting January 1, 2016, most Capital BlueCross health plans will include doctor visits by live, high-quality video using a smartphone, tablet, or computer.

Video doctor visits are convenient and less costly than a trip to an urgent care center or emergency room.

They are especially helpful when:

- You need to see a doctor, but can't fit it into your schedule.
- Your doctor's office is closed.
- You feel too sick to leave the house.
- You become sick while traveling.

During video appointments, doctors can diagnose common illnesses and even write prescriptions and send them straight to your pharmacy.
